Endevco unveils new web site with major enhancements for engineers and program managers

Endevco Corporation, the leader in sensing solutions for demanding vibration, shock and pressure applications, today unveiled a totally revamped web site designed to provide a significant resource for engineers, project managers and program managers seeking comprehensive and up-to-date information on advanced sensing solutions.

The new Endevco web site sports an exciting and eye-catching look and feel, while providing a high degree of user friendliness and navigation ease. As a primary focus of sensing solutions information for the industry as well as Endevco customers, the site includes several significant enhancements compared to the previous site. These enhancements will provide design engineers with additional resources to help them learn about, evaluate and select the most effective sensing solution for their specific application.

Site enhancements include:

- Featured/new products highlighted
- Improved product search capability
- No log-in for technical documents such as technical papers and data sheets
- ECCN look-up
- Glossary of terms
- Online customer survey
- Corporate culture, ethics and quality statements
- Management team biographies
- Industry awards and community service involvements
- Media resource center
- eNewsletter archive
- Advertising campaigns

The site will continue to provide information by primary customer market segment (automotive, aerospace, test & measurement, energy, medical), an online RFQ function, complete online/downloadable product catalog and measurement resource, detailed product data sheets, information on technical training courses, worldwide contacts for sales and applications engineering, news release archive and more.

Endevco Unveils New Web Site
2-2-2

“We have always placed a very high priority on providing the industry and our customers with the information and expertise they need for project success,” said Endevco President Scott Silcock. “Our new web site represents a significant investment in time and knowledge to take this vital resource to the next level.”

Since 1947, Endevco has provided the measurement community with the most trusted sensing solutions available for demanding shock, vibration and pressure applications. In those 60 years, the company has helped shaped the industry by guiding practices and standards, pursuing the most accurate measurement and calibration methods, and developing products that set industry benchmarks for precision, reliability and value.

ENDEVCO Corporation, a Meggitt group company, is one of the world's leading designers and manufacturers of dynamic instrumentation for vibration, shock and pressure measurement. The company's comprehensive line of piezoelectric, piezoresistive, ISOTRON[®] and variable capacitance accelerometers are used to solve measurement problems in a wide variety of industries including aerospace, automotive, defense, medical, industrial and marine. Available products include pressure transducers, microphones, electronic instruments, and calibration systems. Founded in 1947 with headquarters in San Juan Capistrano, CA, ENDEVCO has a global network of manufacturing and research facilities, sales offices and field engineers in the U.S., Europe and Asia. www.endevco.com

Meggitt PLC, headquartered in the UK, is an international group operating in North America, Europe and Asia. Known for its specialist extreme environment engineering, Meggitt is a world leader in aerospace, defense and electronic industries. www.meggitt.com
